

Time timer

You can easily track your time management. You can visually see how much time left to work or having a break.

Spike roller

You can play with the roll in one hand while working. The stimulation of the spikes can feel relieving while squeezing it. Spike roll helps you to concentrate.

Tangle chain

You can play with the tangle chain while doing other things. Tangle chain supports the development of your coordination and fine motor skills.

Noise cancelling headphones

If getting easily distracted, these headphones help you to relax and get the background noises less distracting. You can use the noise cancelling function or listen to music via Bluetooth.

Marble toy

Inside the plastic fabric is a small marble. Due to its small size, you can play with it in your pocket out of sight. Helps if your hands are feeling restless.

Magnetics spike balls

You can play with one or both or them at the same time. The spikes give a sense of stimulation and massage like feeling on the skin. Helps when your hands need something to do.

Massage ring

The ring helps you to massage your fingers and to relax. It helps you to concentrate during lessons and it gives you the sensation of stimulation.

Infinity cube

The cube continues for ever, doesn't matter which way you turn it. You can play with it while working or during lectures. The cube supports your concentration.

Squeezable stress ball

You can squeeze this stress ball when feeling stressed. The ball also helps with relaxing and concentrating.
